LETTERS OF RECOMMENDATION & APPLICATION SUBMISSIONS

Letters of Recommendation:

- Every time students add a school to your college list in Naviance, they will need to go in and request a letter of recommendation (LOR) from their teacher(s) for that school.
- If students add additional schools to their college list in Naviance after they've made an initial LOR request to a teacher, they must make a new request
 - Students must put a note in the request that states how they are applying to each school - example: CommonApp or not.

Application Submissions:

- If students submit an application prior to a deadline date, a school may start the review process in advance of that deadline.
- If students are applying to regular decision schools and submit their application early, there is a chance that the school will review their application without updated grades.
- If students want their first or second quarter grades to be reviewed with their application please wait to submit their application until closer to the deadline.

When a student applies to college, the college admissions office collects a folder of information to consider as they make a decision regarding the applicant. Students and parents should be aware of the parts of an application folder and be prepared to follow directions provided by the college.
